Para 2a): Do you have a national observer programme? YES NO
If so, have you submitted an annual observer implementation report (para 2d) to the Secretariat?
YES NO .

The observer program of Chinese Taipei's *D. gigas* fishery is developing since early 2018. The observer program for squid fishery is modified from the observer program for tuna fishery which has been accredited by Regional Fisheries Management Organizations in the Western and Central Pacific.

Para 4: Please describe the systems you use to verify your SPRFMO fishery data.

Our squid jigging vessels are required to daily fill in their logbooks and report catch data through the electronic logbook system. Data will be delivered to the commissioned professional institution for compilation, debugging, analysis and storage in database. Fishing vessels intending to conduct at-sea or in-port transshipment are required to obtain prior approval from the Fisheries Agency (FA). After the completion of transshipment, the vessel owner is required to submit the transshipment declaration to the FA within prescribed time. Transshipment information is incorporated into the Deep Sea Fisheries Management System (DSFMS). Such information will be used as criteria to review the application for catch document and certificate. In case fishing vessels intend to conduct landing in domestic ports or foreign ports, the vessels are also required to obtain prior approval from the FA. After the completion of landing, the owners are required to submit landing declaration to the FA within prescribed time. The FA will send inspectors randomly to monitor the landing of vessels that have applied for landing in domestic ports; for in-port transshipment or landing in foreign ports, depends on the case the inspection is commissioned by the independent third party. For both landing and transshipment, the owners are required to submit copies of invoices on sale of catches to the FA. Such information is also incorporated in the DSFMS.
