Have you implemented systems to ensure that all of your vessels that fish in the Convention Area have an operational VMS system (that conforms to the requirements in CMM 4.02 (Data standards; 2016) paragraphs 3(b) and 3(c)? YES NO .

Liberia has instituted a VMS requirement for all Liberian flagged vessels engaged in transshipment operations in all Conventions Areas, including the SPRFMO Area. Through CLS America, our vessels are equipped with Thorium LEO units which are geo-localization terminals used for acquiring positions using GPS constellation and the reception/transmission of data using the Iridium system. The units also comprise of tablets with pre-programmed e-forms which can be sent directly to the Secretariat and the vessel monitoring center. Liberia also has a condition for all of our vessels to ensure that the VMS units are operational at all times. In case a VMS unit is found inoperable, a vessel is required to report immediately to the Flag. The VMS units are tamper-proof and will emit an electronic message if tampered with.

Please describe the systems you use to verify your SPRFMO fishery data.

The position data received via the Thorium LEO units are monitored via a web application supplied by CLS (MyData/HALIOS). This web interface for data visualization provides hourly position reports on all Liberian flagged vessels which have been issued a Transshipment License. The data consists of vessel name, terminal ID, position, date, speed and heading. The data can be displayed either on a map or a list. The system is accessed daily for confirmation that the VMS units are functioning and transmitting the required data. Transshipment data is received manually on a monthly basis in spread-sheet format from the operator of vessels which have engaged in transshipment activities.

CMM 4.03 Bottom fishing in the SPRFMO Convention Area

Do you fish in the Convention Area using bottom fishing methods? YES NO .

If yes, then please complete the following tables and questions:

Table 5: Management of Bottom Fishing and Fisheries

Bottom Fishing restricted to footprint?	2002-2006 Average annual catch (t)	Provisional catch total for last year ¹ (t)	Observer coverage level (trawl)	Observer coverage level (other)	No. of VME encounters above the threshold	No. of monthly reports provided
YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>	YES <input type="checkbox"/> NO <input type="checkbox"/>						

Have you prohibited your vessels from participating in bottom fishing activities in the Convention Area, except when in accordance with this measure? YES NO .

Have you established threshold levels for VME encounters? YES NO .

If so what are they?

Liberia does not have vessels engaged in actual fishing, let alone bottom fishing.

Do you require your vessels to cease fishing operations within 5 nautical miles of any site where threshold levels are exceeded? YES NO .

[Click here to enter text.](#)

Did you enforce any of the measures described under CMM 4.04(IUU List; 2016) paragraph 12? YES NO .
If so, please elaborate.

Pursuant to Liberia Marine Notice FTP-001, Liberian flagged vessels engaged in transshipment activities are prohibited from engaging in transshipment operations with vessels not registered on the SPRFMO list of vessels authorised to fish/transship in the Area, taking on board, transshipping/landing undersized fish in ways which undermine SPRFMO CMMs, transshipping with, or participating in joint operations with vessels included on the IUU list, and engaging with vessels which do not record and/or report their catches made in the Convention Area, or make false report to the Secretariat. Further, Liberia Fisheries Regulations (2010) prohibits IUU fishing is one of many grounds for denying licenses and authorizations.

CMM 4.05 Commission record of Vessels authorised to fish in the Convention Area

Describe how you take into account the vessel and operator compliance history when considering whether or not to authorise a particular fishing vessel.

Prior to issuing a transshipment license/authorization, we conduct a due diligence review of the vessel's commercial history and the combined RFMOs' IUU list. The vessel Owner/Operator further has to sign an Attestation relating to IUU fishing. If the vessel is found to have engaged in prior IUU activities, we deny its application into our transshipment program.

Describe the measures you have taken to ensure that you are able to take effective enforcement actions against the owners of vessels flying your flag should the need arise.

Liberia has taken numerous measures to ensure that we are able to take enforcement actions against the Owners/Operators of vessels flying the Liberian flag. For example, we have approximately 400 inspectors/auditors worldwide who are able to meet and inspect vessels in various ports, and if an infringement is found, said vessel can be detained for further investigation and appropriate Flag State action as deemed necessary.

Do you maintain your own register of fishing vessels for the SPRFMO Area?

YES NO

Does it contain all the necessary information (as described in Annex 1 of CMM 4.05(Record of Vessels; 2016)?

YES NO

Are there any reasons that this vessel information has not been collected?
