Taking into account the UNGA Resolution 46/215 Large-scale pelagic driftnet fishing and its impact on the living marine resources of the world's oceans and seas, Chinese Taipei has adopted and revised when necessary from 1992 relevant Directions prohibiting its vessels from engaging in fishing activities with drift-nets on the high seas. Vessels flagged to Chinese Taipei operate with neither large-scale pelagic driftnets nor deep-water gillnets on the high seas.

Have you implemented systems to ensure that all of your vessels that fish in the Convention Area have an operational VMS system (that conforms to the requirements in Paras 3(b) and 3(c)? YES  NO

All vessels of Chinese Taipei authorized to fish in the Convention Area are equipped with VMS.

Please describe the systems you use to verify your SPRFMO fishery data.

Our squid jigging vessels are required to daily fill in their logbooks and electronic logbooks for submission to our Fisheries Agency(FA) for perusal. Data will be delivered to the center of fisheries research for compilation, debugging, analysis and storage in database. Fishing vessels intending to conduct at-sea or in-port transshipment are required to obtain prior approval from the FA. After the completion of transshipment, the vessel owner is required to submit the transshipment declaration to the FA. Transshipment information is also incorporated into the Fisheries Management Information System(FMIS). Such information will be used as criteria to review the application for catch document and certificate.

When fishing vessels return to domestic ports and land their catches, the FA will send inspectors randomly to monitor the landing of the fish. The fish markets at unloading ports maintain information on landing and sale of catches. In case that vessels land their catches in foreign ports, the owners are required to submit copies of invoices on sale of catches to the FA after custom clearance. Such information is also incorporated in the FMIS.

The vessels of Chinese Taipei currently operating in the Convention Area are not using either demersal longline or trawl gear. This CMM is not applicable to Chinese Taipei. In addition, Chinese Taipei has only conducted squid jigging in the Area. Due to the fishing pattern of squid jigging, there was no information about non-target species bycatch.
