CMM 01-2023 *Trachurus murphyi*¹

General Provisions

Para 1: Did your flagged vessels operate in the *T. murphyi* fishery in, or adjacent to (including waters under National Jurisdiction), the Convention Area or did any vessels land or tranship *T. murphyi* within your ports?

YES

If yes, complete the following tables and relevant questions on this CMM

NO ☐

If no, and you did not have CJM quota, skip to the next CMM. If you had CJM quota, update Table 1 (Catch Limit/Transfers) on the next page before proceeding to the next CMM.

Cooperation in Respect of Fisheries in Adjacent Areas Under National Jurisdiction

Para 24: Is any part of your national jurisdiction area adjacent to the Area to which CMM 01-2023 (*T. murphyi*) applies?

YES ☒

If yes, please answer the questions below

- Have you decided to apply the measures described in CMM 01-2023 (*T. murphyi*) paragraphs 12-24 within your national jurisdiction areas?

YES ☒

NO ☐

Partial ☐

- Have you informed the Secretariat about conservation and management measures in effect for *T. murphyi* within your national jurisdiction areas (e.g., TAC resolutions)?

YES ☒

NO ☐

The National regulation, as has been explained in reports from previous years, is based mainly on the General Law on Fisheries and Aquaculture, which, in addition to establishing the decision-making process for the various fisheries, instituting not only Technical Scientific Committees (advice scientific) and Technical Committee (body that brings together the different stakeholders), article 7E establishes the process by which the CMMs adopted within the framework of international treaties where Chile is a Party, are applicable to the entire fleet and national activity. The foregoing materializes through a resolution (Resolutions 1006 as of 2023) of the fishing authority that introduces them into the internal legal system in Spanish and that it publishes not only in the Official Gazette, but also on its website and that the SPRFMO Secretariat shares in its website for those who need to see it in Spanish. All SPRFMO measures fully apply to our fleet in the Convention Area and in particular, 01-2023 not only in the aforementioned area, but in our own EEZ.

Additionally, in 2022 (December), Chile established a TAC through its Exempt Decree 69 as of 2022 of the Ministry of Economy, Development and Tourism for all Chilean operations conducted on the resource. It is calculated based on the discussions held before the SPRFMO SC and it is equivalent to total tons established for Chile in CMM 01-2023. In this opportunity, the TAC for Chile was 703.800. However, given the fact that the quota established for Chile at the last meeting was 716.758, such decree was amended for adjusting it for this latter amount.

NO ☐

Para 26: Are you a coastal State that has not given your express consent under Article 20 paragraph 4(a)(ii) of the Convention?

YES ☐

If yes, please answer the questions below

- Have you established domestic measures for catches of *T. murphyi* that may result in catches in the area under your national jurisdiction exceeding 98 168 tonnes?

Chile, as it has done every year, informed the SPRFMO Scientific Committee (SC) through the National Report of the results of the investigations regarding Chilean Jack Mackerel. Among other matters on: i) Fishery Monitoring; ii) Bycatch Research and Monitoring Program for Jack Mackerel; iii) Hydroacoustic assessment of Jack mackerel between Arica-Parinacota and Valparaíso Regions, 2023; iv) Hydroacoustic assessment of Jack mackerel between Valparaíso and Los Lagos Regions, 2023; v) Assessment of the total allowable catch; vi) Population Genetics of Chilean Jack Mackerel (*Trachurus murphyi*) in the South Pacific Ocean and, vii) Updating information associated with age and growth of Jack Mackerel, in the context of the SPRFMO.

Additionally, the following studies (working paper) were submitted to the SC:

- SC11-JM05 Ageing update of CJM and estimation of age error Matrix (CHL)
- SC11-JM06_rev1 Effort Creep in the JM south central fleet in Chile (CHL) (rev1, 01Sep)
- SC11-JM07 A Bayesian spatio-temporal approach for the standardization of CPUE in the *Trachurus murphyi* fishery of central-southern Chile (CHL)
- SC11-JM10 Update up to June 2022 of the Chilean jack mackerel abundance index based on the catch per fishing set (CHL)
- SC11-JM11 Update of the Chilean Jack Mackerel CPUE abundance index based on catch by fishing trip in the south-central Chile (CHL)
- SC11-JM12 CJM abundance index estimated by spatiotemporal SPDE-based GLM and compare with other CPUE indices (CHL)

¹ Although the percentage indicated in the respective column is 22.3%, this corresponds only to onboard inspections at sea. Without prejudice to the above, Chile reached a total of 39.2% when including the inspections carried out in port on the national fleet, as it was reported to the SC in the Annual National Report of Chile.

- SC11-JM14 Population genomics and environmental associations in *Trachurus murphyi* in the South Pacific Ocean (CHL)
- SC11-JM15 Hydroacoustic assessment of Chilean Jack Mackerel carried out in the north and south-central area of Chile (2023)
- SC11-HM05 Spatial distribution and biomass estimate of Chilean jack mackerel off South central Chile 2023 (CHL)

Para 18: Please summarise or list the methods used to prevent tampering of ALCs on individual vessels

Regarding the methods used by Chile to prevent tampering of ALCs on individual vessels and among others, we are able to mention, that seals are installed to prevent tampering. For this purpose, every time a vessel requires adding or changing equipment, it must be installed by an inspector from the Chilean maritime authority. In addition, every time a vessel is inspected, it is verified that the Security features are in place, including the verification of numbered equipment and seals.

For its part, before the equipment is acquired, it must be certified. This includes, among other things, having a series of alarms, whether it is for box opening, antenna blocking, turning on and off. After several tests, it obtains such authorization through a resolution of the General Directorate of the Maritime Territory and Merchant Marine.

Para 19: Please provide the following information for each vessel flying your flag and reporting to the SPRFMO VMS (note that it is perfectly acceptable to provide or attach a separate file).

Para 8: Do you have sufficient capacity to conduct inspections in every designated port?

YES ☒
NO ☐

According to national regulations DS N° 123, 2004 and Exempt Resolution N° 1659, 2004, every foreign vessel that access to Chilean authorized ports shall be inspected by the Competent Port Authority, SERNAPESCA. To this end, the Service has trained inspectors and the required infrastructure in each of the 8 authorized ports. The only cases in which the inspection is not carried out are for those vessels that enter port due to force majeure (1 case this season).

The difference between the number of port call requests (48) and inspections carried out (45) was due to the fact that one access request was postponed (not carried out in September), and two inspection reports were completed in October.
