ANNEX 5 Provisional IUU Vessel List	29

8TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE

21 to 23 January 2021

CTC8 – Meeting Report

1. Welcome and Introduction

- 1 The Chairperson of the Compliance and Technical Committee (CTC), Mr Andrew Wright (New Zealand) opened the 8th meeting of the CTC.

2. Administrative Arrangements

a. Adoption of the Agenda

- 2 The **CTC adopted** the agenda (CTC8-Doc01_rev1 and CTC8-Doc02) without modification (Annex 1).

b. Meeting Documents

- 3 The Secretariat presented the list of meeting documents (CTC8-Doc03). The list of participants is in Annex 2.

c. Programme and Timetable

- 4 The Chairperson presented the provisional timetable contained in COMM9-Doc04. The final programme and timetable are in Annex 3.

d. Rapporteur and report writing

- 5 The Chairperson asked the Secretariat to provide rapporteur and report writing services for this meeting.

3. Assessment of Compliance of Members and CNCPs

a. Consideration of the Revised Draft Compliance Report

- 6 The Secretariat introduced the revised Draft Compliance Report (CTC8-Doc05 - Restricted). The Chair noted that, consistent with paragraph 11 of CMM 10-2020 the Draft Compliance Report had been reviewed before the meeting and late reports had been assigned a default status of “Non-Compliant, No Further Action”.

- 7 There were three remaining substantive issues for discussion. Firstly, in relation to the issue of missing transshipment data from Panamanian flagged transshipment vessels, at the time that CTC8-Doc05 was published not all Panama transshipment data had been provided. The Secretariat clarified that Panama had provided the outstanding data prior to the CTC meeting, so **the CTC agreed** to assign a status of “Non-Compliant No Further Action”.

- 8 Secondly, in relation to CMM 14c-2019 (EU Exploratory Toothfish Fishery), there was a potential issue of non-compliance for the European Union as regards the seabird/marine mammal abundance count requirements and the target for observing 25% of hooks hauled for marine mammal, seabird and turtle interactions. The European Union explained that the wording in paragraph 20a) of CMM14c-2019 was unclear, particularly around the word “event”, and noted that the observer target was met and even exceeded. **The CTC agreed** to set the status of “Not Assessed” on the basis of potential ambiguity with the meaning of the word ‘event’ in this context. The

CTC noted that provision had been clarified in the new exploratory toothfish proposal, and that CMM14c-2019 has since expired. The CTC was satisfied that this would prevent the situation from occurring again.

- 9 Finally, CMM09-2017, Russia had 2 potential compliance issues with paragraph 9 relating to information on seabird mitigation measures and observed seabird interaction data. Russia confirmed that it had provided additional information about the seabird mitigation device used and the number of seabird mortalities in 2019 (zero). However, CTC requested more information about the particular bird baffler used (such as an image of it when deployed). As a follow up action Russia agreed to provide a photograph of the bird baffler in operation before the next Commission Meeting and **the CTC agreed** to set the status of the issue to “Non-Compliant with a further action”.

b. Follow-up actions taken since the last meeting

- 10 Document CTC8-Doc04, which reports on actions taken by Members and Cooperating Non-Contracting Parties (CNCPs) in response to compliance issues identified at the previous meeting and recommendations made by the Commission, was taken as read. **CTC noted this paper.**

c. Development of Provisional Compliance Report

- 11 The Secretariat developed the Provisional Compliance Report (COMM9-WP08) on the basis of the CTC discussion and the 2021 draft provisional compliance report matrix for consideration by the Commission.
- 12 The CTC expressed its satisfaction for the overall improvement in compliance and adopted the provisional compliance report, the executive summary and the compliance report matrix. The **CTC recommended** that the Commission adopt the Provisional Compliance Report (COMM9-WP08) shown in Annex 4 as the Final Compliance Report,

4. Matters Concerning Implementation of Current CMMs

a. CMM 01-2020 Trachurus murphyi, including exceeding total catch

- 13 The Secretariat presented the *Trachurus murphyi* Implementation report (CTC8-Doc08). It was confirmed by the Secretariat that the TAC set out in paragraph 10 of the measure for the stock throughout its range was overcaught again in 2020 (by 3.4%). Many Members expressed concern that this exceeds the advice from the Scientific Committee. The CTC noted this report and also that there was currently a proposal from one member to amend CMM 01-2020.

b. CMM 05-2019 Commission Record of Vessels

- 14 The Secretariat presented the Commission Record of Vessels Implementation report (CTC8-Doc07). Korea queried some of the numbers relating to ‘active vessels’, and the Secretariat reviewed and revised two papers (CTC8-Doc07_rev1 and CTC8-Doc08_rev1) accordingly. China also had some queries that will require follow-up with the Secretariat regarding vessel numbers after the annual meeting. The CTC noted the report and thanked the Secretariat for the preparation of this information.

c. CMM 06-2018 Commission VMS Implementation report

- 15 The Secretariat presented the Commission VMS Implementation and operation report (CTC8-Doc08). The CTC thanked the Secretariat for the report and requested more specific information on the issues that had been outlined in the paper. There was discussion among the Members as to the possible causes of the issues, and whether they are issues that the Secretariat, Member or the service provider CLS can help to resolve, or whether changes to the measure are required. Some Members also expressed concern that the VMS issues identified in the report amounted to potential compliance issues. The European Union expressed concern that these issues were discovered only by accident. **The CTC agreed on** the following recommendations:

- i. that the Secretariat ensure that future versions of the Commission VMS Implementation and Operation Report contain more detail regarding all identified VMS issues (including those previously identified but not resolved). This should include the nature (including the method of VMS reporting used by the flag State), scope, cause, and potential solution of each identified VMS issue. Where no cause and/or solution has been able to be identified, a troubleshooting approach between Secretariat, Members/CNCP and VMS provider(s) should be proposed to prevent ongoing recurrence of the particular issue. **The Secretariat also agreed** that issues regarding the SPRFMO VMS that were identified but not explored during the 2020 calendar year also be reported on within next year's VMS implementation report presented at CTC 2022.
- ii. that the Secretariat prepare a workplan prior to CTC9 to guide an effective VMS review process in 2023. This workplan should at least provide for a systematic review of previously identified VMS issues, consider whether the Commission VMS is achieving its agreed purpose and principles, and support the continued development of the Commission VMS.

d. CMM 07-2019 Port Inspection Implementation report

- 16 The Secretariat presented the Port Inspections Implementation report (CTC8-Doc09). As regards to the Secretariat's suggestion to add clarity in the CMM regarding the prior notification (paragraph 11), port inspections (paragraph 15) and the inspection procedure (paragraph 22), some Members noted that only the provision related to the notification procedure required further clarification, in particular as regards how to proceed when notable differences are identified between the values for "Declared Quantity Offloaded" and the "Quantity Offloaded". There was support for an intersessional working group to clarify this matter, which the European Union offered to chair. It was suggested that this working group prioritise issues regarding reporting and data discrepancies. **The report was noted by CTC.**

e. CMM 16-2019 SPRFMO Observer Programme

- 17 The Secretariat presented the SPRFMO Observer Programme Implementation Report (CTC8-Doc10_Rev2). The European Union recalled that the Observer Programme is an obligation under Article 28 of the Convention and noted that it had provided a grant of 125,000 euro to SPRFMO to support the accreditation of the national Observer Programmes of Members and CNCPs. The CTC thanked the European Union for providing a voluntary contribution to support the accreditation programme and the Chair reminded Members that funding is also available in 2021.
- 18 The CTC noted that MRAG, the SPRFMO Commission's Observer Programme Accreditation Provider, had provided a favourable Final Evaluation Report on the Observer Programmes of Australia, New Zealand and Chile.
- 19 **CTC recommended that** under paragraph 33 of CMM16-2019 the Commission adopt the Final Reports of the SPRFMO OP Accreditation Evaluator and grant accreditation to the Observer Programmes of Australia, New Zealand and Chile. It was noted that the accreditation processes this year had very tight timelines for Members to do a great deal of work, and it was hoped that process changes could lead to a better experience in future years.
- 20 Australia submitted a COMM9-WP04 proposing several amendments to CMM16-2019 (Observer Programme) with the aim of supporting a more efficient and equitable SPRFMO OP Accreditation process for all Members, CNCPs and service providers. The **CTC recommended** that the Commission further discuss this to ensure the process could be improved for future accreditations.

5. Examination of Current and Draft IUU vessel List

a. 2021 Draft IUU Vessel List

- 21 In accordance with CMM 04-2020, paragraph 9, the CTC examined the Draft and the Current IUU Vessel Lists as well as the additional information provided in accordance with paragraphs 5 and 8 of CMM 04-2020 (CTC8-Doc11 – restricted).
- 22 The CTC discussed the Chinese vessel RUNDA 613, which was included on the Draft IUU List. It was explained by China and subsequently confirmed by the Secretariat that it was a technical error in reporting the vessel as RUNDA 613 when in fact it was the authorised vessel RUNDA 618. The CTC noted that supporting documents were in Chinese and asked that China provide the requested translations in the official language. When these were provided **the CTC agreed to** remove the RUNDA 613 from the draft IUU Vessel List on the basis that the supporting documents demonstrated that there was no opportunity for the vessel to engage in IUU fishing activities.

b. Current IUU vessel List

- 23 The CTC considered the request of Angola to remove the BELLATOR (IMO 9179359) from the current IUU Vessel List. For consistency with the CTC's practice, Members noted that some supporting documents were in Portuguese and the CTC asked Angola to provide English translations. Members noted that they required more detail, in particular to support their assessment of paragraphs 21a, b and c (ii) of CMM 04-2020. This information (in English) was provided and circulated to Members. Many Members felt that the information provided by Angola was comprehensive and had demonstrated Angola's genuine cooperation. However, one Member requested written confirmation from Angola that the shareholders of the new owner were not involved in IUU related issues and that no vessels owned or operated by the relevant company fishing under other flags or in other waters are involved in IUU fishing activities.
- 24 The Chairperson noted that, as there was no consensus on this matter, the CTC could not recommend to remove the BELLATOR from the SPRFMO IUU vessel list. **The CTC referred this to the Commission for further discussion.**

c. Development of a 2021 Provisional IUU Vessel List

- 25 As a result of CTC considerations, there are no vessels on the 2021 Provisional IUU Vessel List. However, **the CTC recommended** that the Commission give further consideration to the request from Angola to remove the BELLATOR from the current IUU Vessel List once the written information from Angola is received.

6. Assessment of CNCP applications

- 26 The CTC considered three applications from Panama, Liberia and Curaçao for CNCP status against the criteria set out in paragraph 3 of Decision 02-2018, as contained in document CTC8-Doc12. The Chair noted that all three CNCPs had made their voluntary contributions and had explicitly agreed to high seas boarding and inspection provisions.
- 27 **The CTC recommended** that all three applications be accepted.

7. Conservation and Management Measures

a. Amendments to current CMMs:

- 28 Due to time constraints, The CTC Chairperson invited all proponents to briefly introduce their proposals and allowed time for initial comments. The CTC Chairperson indicated that, given time constraints and the high

number of proposals that the CTC could consider recommending that all proposals (unless withdrawn) could be forwarded to the Commission for further work.

CMM 01-2020 Trachurus murphyi (COMM9-Prop01)

- 29 Peru introduced its proposal to amend *CMM 01-2020*. Members indicated that they could not support it because it sought to remove requirements that are focussed on achieving increased transparency and accountability with respect to the compatibility of Jack mackerel measures inside Areas of National Jurisdiction and those of SPRFMO are compatible. Members indicated that the paragraphs that were proposed for deletion were important to improve compatibility and noted that a considerable amount of time had been spent negotiating them last year. Peru noted for the record that they did not support the amendments at COMM8 as evidenced by their vote against adoption and the 2 statements they made that are appended to that report and has presented national conservation measures that are compatible with those of the Convention and, amongst other points raised, Peru expressed its disagreement with what is stated in paragraph 27 of CMM01-2020 where it says that “States that have not given their express consent under Article 20 paragraph 4(a)(ii) [...] to agree” to what is stated in literals a), b), and c), when Peru has clearly stated its disagreement with that arrangement, and had voted against it in 2020.
- 30 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 03-2020 Bottom Fishing (COMM9-Prop02)

- 31 Australia introduced its proposal to modify *CMM 03-2020*. Australia explained its ambition to implement the UN General Assembly Resolutions which called for the prevention of significant adverse impacts on vulnerable marine ecosystems. Australia also noted the Scientific Committee identified a range of uncertainties and recommended additional precaution. Australia explained that due to the meeting constraints it had only sought to respond to this by ensuring that the Scientific Committee was not limited in its considerations following an encounter and to lower the VME thresholds but recognised further work would be needed. Recognising that multiple proposals had been submitted, Australia explained that New Zealand, Australia, European Union and the United States of America are working to make progress on a consensus text. Australia noted that a revised version of the proposal COMM9-Prop02_rev1 had been circulated which demonstrated progress in these discussions.
- 32 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 03-2020 Bottom Fishing (COMM9-Prop03)

- 33 The European Union noted that their Proposal had the same aims as Australia’s, notably to address on-going uncertainties in the predictions of the habitat suitability model and to ensure the protection of VMEs from Significant Adverse Impacts (SAI), and noted that discussions were continuing with other delegations.
- 34 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 03-2020 Bottom Fishing (COMM9-Prop04)

- 35 New Zealand noted that their Proposal also had the same aims, but took a different approach, focussed on spatial management and that they were continuing to engage with other delegations.
- 36 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

*CMM 03a-2020 Deepwater species (COMM9-Prop05)*

- 37 New Zealand introduced its proposal to establish an orange roughy catch limit for the Tasman Sea area for the 2021 and 2022 fishing years. One Member expressed concern about the potential bottom fishing impact of the Orange roughy fishery and noted that bilateral discussions about this and the other bottom fishing proposals were ongoing.
- 38 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 05-2019 Commission Record of Vessels (COMM9-Prop06)

- 39 Peru introduced its proposal, noting their concern that the current CMM was geared to large vessels rather than small artisanal vessels, which may not be able to obtain IMO numbers or Inmarsat. However, these vessels would still be expected to have communication and location equipment on board, as well as unique national numbers. Several Members asked for more information about why the exemption is necessary and Peru explained the situation further noting the vessels do have unique National identification numbers as well as other communication (non-Inmarsat) equipment onboard.
- 40 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 06-2020 VMS (COMM9-Prop07)

- 41 Chile introduced its proposal. While there was much support for the proposal, some Members were concerned about its implications for flag State rights under international law. However, a number of Members noted that Chile's proposal was consistent with international law and consistent with the functions and jurisdiction of the Commission, as well as providing a useful source of information to inform coastal State MCS activities that benefit the whole Commission. Australia suggested an amendment so that both coastal and flag States would be informed when a vessel leaves the Convention Area and enters a Member's EEZ.
- 42 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 07-2019 Port Inspections (COMM9-Prop08)

- 43 Chile introduced its proposal and a number of Members indicated support for the increase in the minimum inspection rate. However, Peru noted that although they inspect nearly 100% of foreign vessels, they would prefer to avoid use of the word "shall" in paragraph 15 to avoid impacting the sovereign rights of coastal States to control their operations. Chinese Taipei noted that the new proposed inspection rate is ten times higher than before, and that since inspection of carrier vessels is more burdensome, a different rate for different vessel types should be considered. The European Union proposed a minor amendment to the port call request template (Annex 1), and New Zealand volunteered to assist with drafting.
- 44 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 11-2015 Boarding and Inspection (COMM9-Prop09)

- 45 The United States of America presented its proposal. It had support from many Members, noting it was a mature proposal and had been advanced over many years but some Members noted that there were still issues and Members agreed to continue to work bilaterally.
- 46 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 12-2020 Transshipment (COMM8-Prop10)

- 47 Ecuador introduced an amended version of their proposal COMM9-Prop10_rev1 with protocols to carry out the transshipment of jumbo flying squid only in port. Many Members supported Ecuador for their efforts to improve SPRFMO's MCS regime and recognised the importance of improving the Transshipment regime. Many Members also recognised the need to ensure that the squid fishery was appropriately regulated under this measure, consistently with the other SPRFMO fisheries. Some Members expressed that this proposal has no legal basis and several Members asked whether the changes were necessary at this time, when the existing CMM had only just come into force (on 1 January 2021) and is scheduled for review in 2022. Other Members did note that there may be a legitimate basis for transshipment at sea as long as it is well regulated.
- 48 The Chairperson suggested that Ecuador incorporate into their proposal the simplified template for the reporting of transshipment details required by paragraph 8 of CMM12-2020 and presented in CTC8-Doc13.
- 49 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 13-2020 Exploratory fisheries – Chile (COMM9-Prop11)

- 50 Given time constraints, this proposal was not discussed at CTC.

CMM 14b-2020 Exploratory Potting - Cook Islands (COMM9-Prop12)

- 51 Given time constraints, this proposal was not discussed at CTC.

CMM 16-2019 Observer Programme (COMM9-Prop13)

- 52 Peru introduced its proposal noting that small vessels will not be able to have observers on board, so this would be an impediment to artisanal vessels entering the high seas fishery. It was suggested that electronic monitoring or training fishers may be an option. Peru noted that they intended to boost monitoring by port sampling or interviewing. Another Member suggested a review clause once the measure had been in place for a few years to see the impact of the exemption.
- 53 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 18-2020 Squid (COMM9-Prop14)

- 54 Ecuador introduced a revised version of its proposal (COMM9-Prop14_rev1). Many Members welcomed Ecuador's proposal and recognised the importance of improving independent observation in this fishery and stated their support for the proposal. One Member raised concerns that this proposal was submitted without Scientific Committee advice and that there would be implementation issues since the existing CMM just came into force in January 2021. One Member suggested that, in order to improve observer coverage levels in the squid fishery, electronic monitoring could be incorporated into the observer coverage requirements as an alternative means of data collection.
- 55 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

CMM 18-2020 Squid (COMM9-Prop15)

- 56 The European Union introduced its proposal to limit vessel capacity in the squid fishery to current levels during the period from 2021 to 2023, while allowing the possibility for developing coastal States to submit a request to the Commission to increase their individual capacity limits. There was some support for this proposal, but there were comments and questions about how to limit fishing capacity, the historical consideration period, the procedure to consider requests by developing coastal States, the conditions to apply to increase capacity and

the approaches on different size of fleets. Members offered to work with the European Union to further refine the proposal.

57 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

58 The Chairperson suggested that European Union incorporate into their proposal the Squid Monthly Catch and Effort data template required by paragraph 3 of CMM18-2020 and presented in CTC8-Doc13.

b. New CMMs

New CMM for an Exploratory Toothfish Fishery by the EU (COMM9-Prop16)

59 Given time constraints, this proposal was not discussed at CTC.

New CMM for Vessel Markings and Identification (COMM9-Prop17)

60 There was general support for the proposal with some technical issues and clarifications to be resolved and Members were asked to provide detailed comments in writing to the United States of America.

61 **The CTC recommended** that this proposal be forwarded to the Commission for its consideration.

c. CMMs for review in 2021

62 There were submitted proposals relating to all the CMMs that had been scheduled for review, and so there was no further discussion under this item.

8. Other Matters

63 The Secretariat presented CTC8-Doc13 which includes a template for the collection of Observer data in the squid jigging fishery that had been requested by CMM18-2020, developed by China and amended and endorsed by SC08. It was agreed that this would be included in CMM02. The Secretariat also noted as per the Chairperson's request, the European Union and Ecuador would be contacted to add two other templates that had been requested in CMM12 and CMM18 to their respective proposals.

64 FAO introduced their paper COMM9-Obs04 describing a proposal for SPRFMO to undertake an IUU fishing estimation assessment in the jumbo flying squid fishery in accordance with the standardised field guide developed by FAO. There were questions asked by Members to FAO as to why the jumbo flying squid fishery had been highlighted as needing to be assessed. The FAO replied that this fishery was chosen because of its high public profile nature and that the analysis would be useful to inform these discussions. The Chairperson thanked FAO for the presentation and suggested that, due to time constraints, that additional questions should be directed to FAO. The Secretariat noted that it was prepared to work on this project with FAO if directed to by the Commission.

65 **The CTC noted this paper** and thanked the FAO for their presentation.

CALAMASUR paper COMM9-Obs01 was brought to the attention of the meeting with the Chairperson offering members an opportunity to comment; however, it was not discussed during CTC as CALAMASUR was not present on the call at the time to introduce their paper.

9. Office Holders

a. Election of CTC Chairperson and Vice-Chairperson

66 The Chairperson explained that the second term of the CTC Vice-Chairperson (Mr Luis Molledo, European Union) will conclude at the close of the 9th Commission meeting. As no nominations had been received, this would be resolved at the Commission. The Chairperson and CTC also thanked Mr Luis Molledo for his time as CTC Vice-

Chairperson. No nominations were received for CTC Vice-Chairperson, as such, this matter was referred by the CTC to the Commission for further discussion.

10. Adoption of the CTC Report

- 67 The draft meeting report was prepared during the meeting by the Secretariat, reviewed by the Chairperson, and presented to the CTC for its consideration.
- 68 The CTC adopted the provisional compliance report (Annex 4).
- 69 The report was adopted on 01 February 2021 at 23:57hrs NZDT.

11. Close of Meeting

- 70 After adoption, the Chairperson thanked the Members, CNCs and observers for their good work and offered his appreciation to the Secretariat for the effective running of the CTC, particularly given the limitations of having to meet virtually this year.
- 71 The CTC expressed their appreciation to the Secretariat for their support throughout the meeting.
- 72 The CTC expressed their appreciation to the Chairperson for his leadership including calling for intersessional meetings to help support the work of this Subsidiary Body especially this year and considering the unusual circumstances caused by the global pandemic. The meeting was closed 01 February 2021 at 23:58 hrs NZDT.

8TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE

21-23 January 2021

CTC8 – Report ANNEX 1 CTC 8 Agenda

1. WELCOME AND INTRODUCTION
2. ADMINISTRATIVE ARRANGEMENTS
 - a. Adoption of the Agenda
 - b. Annotated agenda
 - c. Meeting Documents
3. ASSESSMENT OF COMPLIANCE OF MEMBERS AND CNCPS
 - a. Consideration of the Draft Compliance Report
 - b. Follow-up actions taken since the last meeting
 - c. Development of Provisional Compliance Report
4. MATTERS CONCERNING IMPLEMENTATION OF CURRENT CMMs
 - a. CMM 01-2020 *Trachurus murphyi*
 - b. CMM 05-2019 Commission Record of Vessels
 - c. CMM 06-2020 Commission VMS Implementation report
 - d. CMM 07-2019 Port Inspection Implementation report
 - e. CMM 16-2019 SPRFMO Observer Programme including evaluation of Observer Programmes
5. EXAMINATION OF CURRENT AND DRAFT IUU LIST
 - a. Examination of the 2021 Draft IUU List
 - b. Examination of the Current (2020) IUU List
 - c. Development of a 2021 Provisional IUU List
6. ASSESSMENT OF CNCPS APPLICATIONS
 - a. Current CNCPS
 - b. Other applicants
7. CONSERVATION AND MANAGEMENT MEASURES
 - a. Proposals to amend current CMMs
 - a1. CMM 01-2020 *Trachurus murphyi* (PE)
 - a2. CMM 03-2020 Bottom Fishing (AU)
 - a3. CMM 03-2020 Bottom Fishing (EU)
 - a4. CMM 03-2020 Bottom Fishing (NZ)
 - a5. CMM 03a-2020 deepwater species (NZ)
 - a6. CMM 05-2019 Record of Vessels (PE)
 - a7. CMM 06-2020 VMS (CL)
 - a8. CMM 07-2019 Port Inspections (CL)
 - a9. CMM 11-2015 High Seas Boarding and Inspection (US)
 - a10. CMM 12-2020 Transshipment (EC)
 - a11. CMM 13-2020 Exploratory Fisheries (CL)
 - a12. CMM 14b-2020 Exploratory Potting (CK)
 - a13. CMM 16-2020 Observer Programme (PE)
 - a14. CMM 18-2020 Squid (EC)
 - a15. CMM 18-2020 Squid (EU)
 - b. Proposals for new CMMs
 - b1. Exploratory Toothfish (EU)
 - b2. Marking and Identification of Fishing Vessels (USA)

- c. CMMs for review in 2021:
- 8. OTHER MATTERS
- 9. OFFICE HOLDERS
 - a. CTC Chairperson and Vice-chairperson
- 10. ADOPTION OF THE CTC REPORT
- 11. CLOSE OF MEETING

8TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE

21-23 January 2021

CTC8 – Report ANNEX 2 List of Participants

CTC CHAIRPERSON

Andrew WRIGHT

8TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE

21-23 January 2021

CTC8 – Report ANNEX 4 Provisional Compliance Report

As per paragraph 18 of CMM 10-2020 (CMS), the Provisional Compliance Report shall not constitute public domain data, but the Final Compliance Report and the executive summary shall be public domain data (refer [Annex 6a of the COMM9-Report](#)).

8TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE

21-23 January 2021

CTC8 – Report ANNEX 5 Provisional IUU Vessel List

As per standard SPRFMO practice, the Provisional IUU Vessel List is not a public domain document, noting that the Final IUU Vessel List is contained in [Annex 6b of the COMM9-Report](#).
