12 September 2022

**Annual Report of the Kingdom of Denmark in respect of the Faroe Islands to
the 10th Scientific Committee Meeting**

On Fishing and Research Activities in the SPRFMO Area during 2022

The Kingdom of Denmark in respect of the Faroe Islands hereby submits its Annual Report to the Scientific Committee. Reference is made to SPRFMO SC7-Report Annex 12 concerning SC Guidelines for Annual Reports to the SPRFMO SC.

The Faroe Islands currently have no vessels participating in fisheries inside the SPRFMO convention area. As such the Faroe Islands have no data to the SC regarding fishing, research, and management activities over the previous year.

In 2022 the Faroe Islands agreed to transfer its 2022 quota of 9.978 tonnes of *Trachurus murphyi* to Chile. This was subject to the approval of Chile and is without prejudice to future agreements on the allocation of fishing opportunities as per paragraph 9 of CMM 01-2022.

The Faroe Islands have a continuing interest in the fisheries managed by SPRFMO and hope in the future again to have Faroese flagged vessels that fish the *Trachurus murphyi* quota. If this would be the case, the Faroe Islands would provide the SC with relevant data and information and abide with relevant measures adopted.

Yours sincerely

Durita Lamhauge Jóansdóttir
Head of Delegation
