

6. ADMINISTRATIVE MEASURES

Current Administration Measures

The administrative measures applied to the jumbo squid fishery began in 2012, with the aim of maintaining the sustainability of the fishery for this resource. In this context, the Undersecretary of Fisheries and Aquaculture declared this resource in a state of full exploitation, restricting access. On the other hand, in the same year, an annual global catch quota was established and its fishing was prohibited as a target species for making flour (Table 6).

Table 6.- Main existing administration measures in Chile for jumbo squid.

ADMINISTRATIVE MEASURES	Purpose	Normative
Regimen	Freedom of Fishing Regime and General Access Regime, both assimilated to a state of full exploitation from the Arica and Parinacota Region to the Magallanes Region.	Res. Ex. N° 752/12 Res. Ex. N° 3421/14 Res. Ex. N° 3.974/2019
Access	Suspension of the registration of the resource in the Artisanal Fisheries Registry (RPA), between the regions of Arica and Parinacota to the Region of Magallanes, for having reached the state of full exploitation. Valid until December 31. 2024.	Res. Ex. N° 752/12 Res. Ex. N° 3421/14 Res. Ex. N° 3.974/2019
Annual Global Catch Quota (CGAC)	The CGAC of cuttlefish for the year 2020 is 200,000 tons: Reserve quota for research: 1000 t Reserve quota for by-catch: 4000 t Target quota: 195,000 t	D. Ex. Folio DEXE202000130 MINECON
Fishing gear	It establishes that jumbo squid can only be extracted as a target fish, using jig or hand line as a fishing tackle.	Ley N° 21.134/2019
Other measures	Jumbo squid (<i>Dosidicus gigas</i>) is eliminated from the list of hydrobiological resources to be used as raw material in the production of fishmeal.	D.S N° 98/2012
